NASDAQ OMX BX TotalView-ITCH 5.0

1 Overview

1.1 *Product Description*

NASDAQ OMX BX TotalView-ITCH ("BX TotalView-ITCH") is a direct data feed product offered by NASDAQ OMX BX.

BX TotalView-ITCH 5.0 is being released in association with several data feed enhancements detailed in [Data Technical News #2013-33](#).

BX TotalView-ITCH features the following data elements that support trading on the BX exchange in all exchange-listed equities securities:

- **Order level data with attribution:** The BX TotalView-ITCH 5.0 data feed provides its full order depth using the standard ITCH format. ITCH uses a series of messages of order messages to track the life of a customer order.¹ As an added feature, the message formats will support market participant attribution. BX TotalView-ITCH 5.0 carries order level data for all U.S. exchange-listed equities.
- **Trade messages:** To ensure that customers have complete information about BX market order flow, NASDAQ OMX BX TotalView-ITCH 5.0 supports a trade message to reflect a match of a non-displayable order in the BX system.
- **Administrative messages**, such trading actions and symbol directory messages:
 - Trading action messages are used to inform market participants when a security is halted or released for trading.
 - Symbol Directory messages provide basic security data such as the market tier and Financial Status Indicator.
 - Market participant position message carries the Primary Market Maker status, Market Participant status and Market Maker mode fields used by some firms to comply with market regulations.
- **Event controls**, such as start of day, end of day and emergency market halt/resume.

1.2 *Upcoming Product Enhancements*

As noted above, the BX TotalView-ITCH 5.0 feed is designed to support the expanded equity symbols up to 8 characters in total length.

In addition, the BX TotalView-ITCH 5.0 is designed to support BX listing market functionality. NASDAQ OMX has filed with the U.S. Securities and Exchange Commission (SEC) to establish listing standards for the BX exchange.

[All new values and enhanced functionality to support the BX Listing Market is highlighted in blue to assist subscribing customers in identifying the changes.](#)

¹ NASDAQ OMX BX TOTALVIEW-ITCH is an outbound market data feed only. The ITCH protocol does not support order entry. For information on NASDAQ OMX BX order entry protocols, please refer to the Trading Services section of the NASDAQ OMX Trader website.

NASDAQ OMX BX TotalView-ITCH 5.0 INTERFACE SPECIFICATION

With the introduction of the BX Listing Market, NASDAQ OMX will enhance the BX trading system to support an opening and closing cross process. In addition, NASDAQ OMX will introduce the following enhancements to the BX TotalView-ITCH 5.0 data feed product:

- **Symbol Directory messages:** NASDAQ OMX will add a new Market Category Code of “B” to clearly identify securities listed on the BX Listing Market.
- **Net Order Imbalance Indicator (NOII) messages:** In the minutes leading up to the new opening and closing crosses, BX TotalView-ITCH will disseminate the indicative clearing price and net order imbalance for BX-listed securities only. Because the calculation includes non-displayable as well as displayable order types in the BX market system, the Net Order Imbalance Indicator (NOII) is the best predictor of the BX opening and closing prices available to the public for BX-listed securities.
- **Cross Trade messages:** The BX TotalView-ITCH data feed will also support a separate Cross Trade message format to clearly denote the price and volume executed during the opening and closing cross process in the BX system for BX-listed securities only.

2 Architecture

The NASDAQ BX TotalView-ITCH 5.0 feed is made up of a series of sequenced messages. Each message is variable in length based on the message type. The messages that make up the NASDAQ BX TotalView-ITCH 5.0 protocol are typically delivered using a higher level protocol that takes care of sequencing and delivery guarantees.

This data feed will be offered in three protocol options:

- [SoupBINTCP](#)
- [Compressed](#) via SoupTCP
- [MoldUDP64](#)

3 Data Types

All integer fields are unsigned big-endian (network byte order) binary encoded numbers.

All alpha fields are left justified and padded on the right with spaces.

Prices are integer fields. When converted to a decimal format, prices are in fixed point format with 6 whole number places followed by 4 decimal digits. The maximum price in NASDAQ BX TotalView-ITCH 5.0 is 200,000.0000 (decimal, 77359400 hex).

4 Message Formats

The BX TotalView-ITCH 5.0 feed is composed of a series of messages that describe orders added to, removed from, and executed on NASDAQ OMX BX as well as disseminate Cross and Stock Directory information.

4.1 Time Stamp – Seconds

For bandwidth efficiency reasons, NASDAQ OMX BX will separate the BX TotalView-ITCH 5.0 timestamp into two pieces:

Timestamp Portion	Message Type	Notes
Seconds	Standalone message on BX TotalView-ITCH 5.0 feed	Reflects the number of seconds past midnight that the Timestamp message was generated.

NASDAQ OMX BX TotalView-ITCH 5.0
INTERFACE SPECIFICATION

		Note: A Timestamp – Second message will be disseminated for every second for which there is at least one payload message.
Nanoseconds	Field within individual message formats on BX TotalView-ITCH 5.0 feed	Reflects the number of nanoseconds since the most recent Timestamp-Seconds message that the payload message was generated.

For the standalone Timestamp – Seconds message, the message format will be as follows:

TIMESTAMP - SECONDS MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"T"	Seconds Message.
Second	1	4	Integer	Number of seconds since midnight.

4.2 System Event Message

The system event message type is used to signal a market or data feed handler event. The format is as follows:

SYSTEM EVENT MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"S"	System Event Message.
Timestamp	1	4	Integer	Nanoseconds portion of the timestamp.
Event Code	5	1	Alpha	See System Event Codes below.

NASDAQ OMX BX supports the following event codes on a daily basis on the BX TotalView-ITCH 5.0 data feed.

SYSTEM EVENT CODES – DAILY	
Code	Explanation
"O"	<i>Start of Messages.</i> Outside of time stamp messages, the start of day message is the first message sent in any trading day.
"S"	<i>Start of System hours.</i> This message indicates that NASDAQ OMX BX is open and ready to start accepting orders.
"Q"	<i>Start of Market hours.</i> This message is intended to indicate that Market Hours orders are available for execution.
"M"	<i>End of Market hours.</i> This message is intended to indicate that Market Hours orders are no longer available for execution.
"E"	<i>End of System hours.</i> It indicates that NASDAQ OMX BX is now closed and will not accept any new orders today. It is still possible to receive Broken Trade messages and Order Delete messages after the End of Day.
"C"	<i>End of Messages.</i> This is always the last message sent in any trading day.

4.3 Stock Related Messages

4.3.1 Stock Directory

At the start of each trading day, NASDAQ OMX BX disseminates stock directory messages for all active symbols in the system.

Market data redistributors should process this message to populate the Financial Status Indicator (required display field) and the Market Category (recommended display field) for NASDAQ-listed issues [and BX-listed](#).

STOCK DIRECTORY																																
Name	Offset	Length	Value	Notes

Y	ETP is an Inverse ETP											
N	ETP is not an Inverse ETP											

4.3.2 Stock Trading Action

NASDAQ OMX BX uses this administrative message to indicate the current trading status of a security to the trading community.

Prior to the start of system hours, NASDAQ OMX BX will send out a Trading Action spin. In the spin, NASDAQ OMX BX will send out a Stock Trading Action message with the "T" (Trading Resumption) for all NASDAQ- and other exchange-listed securities that are eligible for trading at the start of the

NASDAQ OMX BX TOTALVIEW-ITCH 5.0
INTERFACE SPECIFICATION

system hours. If a security is absent from the pre-opening Trading Action spin, firms should assume that the security is being treated as halted in the NASDAQ OMX BX platform at the start of the system hours. Please note that securities may be halted in the NASDAQ OMX BX system for regulatory or operational reasons.

After the start of system hours, NASDAQ OMX BX will use the Trading Action message to relay changes in trading status for an individual security. Messages will be sent when a stock is halted or paused, is released for quotation, or is released for trading.

STOCK TRADING ACTION				
Name	Offset	Length	Value	Notes
Message Type	0	1	"H"	Stock Trading Action Message.
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Stock Locate	5	2	Integer	Locate code identifying the security symbol for which the order is being added
Trading State	7	1	Alpha	Indicates the current trading state for the stock. Allowable values: "H" = Halted or paused on across all U.S. equity markets "Q" = Quotation only period for cross-market halt or pause "T" = Trading on BX
Reserved	8	1	Alpha	Reserved.
Reason	9	4	Alpha	Trading Action reason.
Validation ID	13	8	Long	NASDAQ OMX internal system tracking number

4.3.3 Reg SHO Short Sale Price Test Restricted Indicator

In November 2010, the Securities and Exchange Commission (SEC) will implement changes to Rule 201 of the Regulation SHO (Reg SHO). For details, please refer to [SEC Release Number 34-61595](#). In association with the Reg SHO rule change, NASDAQ will introduce the following Reg SHO Short Sale Price Test Restricted Indicator message format.

For NASDAQ-listed issues, NASDAQ will support a full pre-opening spin of Reg SHO Short Sale Price Test Restricted Indicator messages indicating the Rule 201 status for all active issues. NASDAQ will also send the Reg SHO Short Sale Price Test Restricted Indicator message in the event of an intraday status change.

For other exchange-listed issues, NASDAQ will relay the Reg SHO Short Sale Price Test Restricted Indicator message when it receives an update from the primary listing exchange. NASDAQ will process orders based on the most updated Reg SHO Restriction status value.

REG SHO RESTRICTION				
Name	Offset	Length	Value	Notes
Message Type	0	1	"Y"	Reg SHO Short Sale Price Test Restricted Indicator
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Stock Locate	5	2	Integer	Locate code identifying the security symbol for which the order is being added
Reg SHO Action	7	1	Alpha	Denotes the Reg SHO Short Sale Price Test Restriction status for the issue at the time of the

NASDAQ OMX BX TOTALVIEW-ITCH 5.0
INTERFACE SPECIFICATION

				<p>message dissemination. Allowable values are:</p> <p>“0” = No price test in place</p> <p>“1” = Reg SHO Short Sale Price Test Restriction in effect due to an intra-day price drop in security</p> <p>“2” = Reg SHO Short Sale Price Test Restriction remains in effect</p>
--	--	--	--	--

4.3.4 Market Participant Position

At the start of each trading day, NASDAQ OMX BX disseminates a spin of market participant position messages. The message provides the Primary Market Maker status, Market Maker mode and Market Participant state for each NASDAQ OMX BX market participant firm registered in an issue. Market participant firms may use these fields to comply with certain marketplace rules.

Throughout the day, NASDAQ OMX BX will send out this message only if NASDAQ Operations changes the status of a market participant firm in an issue.

MARKET PARTICIPANT POSITION				
Name	Offset	Length	Value	Notes
Message Type	0	1	“L”	Market Participant Position message
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
MPID	5	4	Alphabetic	Denotes the market participant identifier for which the position message is being generated
Stock Locate	9	2	Integer	Locate code identifying the security symbol for which the order is being added
Primary Market Maker	11	1	Alphanumeric	<p>Indicates if the market participant firm qualifies as a Primary Market Maker in accordance with NASDAQ OMX BX marketplace rules</p> <p>“Y” = primary market maker “N” = non-primary market maker</p>
Market Maker Mode	12	1	Alphanumeric	<p>Indicates the quoting participant’s registration status in relation to SEC Rules 101 and 104 of Regulation M</p> <p>“N” = normal “P” = passive “S” = syndicate “R” = pre-syndicate “L” = penalty</p>
Market Participant State	13	1	Alphanumeric	<p>Indicates the market participant’s current registration status in the issue</p> <p>“A” = Active “E” = Excused/Withdrawn “W” = Withdrawn “S” = Suspended “D” = Deleted</p>

4.3.5 Market-Wide Circuit Breaker (MWCB) Messaging

4.3.5.1 MWCB Decline Level Message

Informs data recipients what the daily MWCB breach points are set to for the current trading day.

MWCB Decline Level Message				
Name	Offset	Length	Value	Notes
Message Type	0	1	"V"	Market wide circuit breaker Decline Level Message.
Timestamp	1	4	Integer	Time at which the MWCB Decline Level message was generated
Level 1	5	4	Integer	Denotes the MWCB Level 1 Value.
Level 2	9	4	Integer	Denotes the MWCB Level 2 Value.
Level 3	13	4	Integer	Denotes the MWCB Level 3 Value.

4.3.5.2 MWCB Status Message

Informs data recipients when a MWCB has breached one of the established levels

MWCB Breach Message				
Name	Offset	Length	Value	Notes
Message Type	0	1	"W"	Market-Wide Circuit Breaker Status message
Timestamp	1	4	Integer	Time at which the MWCB Breaker Status message was generated
Breached Level	5	1	Alpha	Denotes the MWCB Level that was breached. "1" = Level 1 "2" = Level 2 "3" = Level 3

4.4 Add Order Message

An Add Order Message indicates that a new order has been accepted by the system and was added to the displayable book. The message includes a day-unique Order Reference Number used by NASDAQ OMX BX to track the order.

NASDAQ OMX BX will support two variations of the Add Order message format.

4.4.1 Add Order – No MPID Attribution

This message will be generated for unattributed orders in the NASDAQ OMX BX system.

ADD ORDER MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"A"	Add Order – No MPID Attribution Message.
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Order	5	8	Integer	The unique reference number assigned to the

NASDAQ OMX BX TotalView-ITCH 5.0
INTERFACE SPECIFICATION

Reference Number				new order. The order reference number is increasing, but not necessarily sequential.
Buy/Sell Indicator	13	1	Alpha	The type of order being added. "B" = buy order. "S" = sell order.
Shares	14	4	Integer	The total number of shares associated with the order being added to the book.
Stock Locate	18	2	Integer	Locate code identifying the security symbol for which the order is being added
Price	20	4	Integer	The display price of the new order. Refer to Data Types for field processing notes.
Validation ID	24	8	Long	NASDAQ OMX internal system tracking number

4.4.2 Add Order with MPID Attribution

This message will be generated for attributed orders and quotations entered into the NASDAQ OMX BX system.

ADD ORDER – MPID ATTRIBUTION MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"F"	Add Order with MPID Attribution Message.
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Order Reference Number	5	8	Integer	The unique reference number assigned to the new order. The order reference number is increasing, but not necessarily sequential.
Buy/Sell Indicator	13	1	Alpha	The type of order being added. "B" = buy order. "S" = sell order.
Shares	14	4	Integer	The total number of shares associated with the order being added to the book.
Stock Locate	18	2	Integer	Locate code identifying the security symbol for which the order is being added
Price	20	4	Integer	The display price of the new order. Refer to Data Types for field processing notes.
Attribution	24	4	Alpha	NASDAQ OMX BX market participant identifier associated with the entered order.
Validation ID	28	8	Long	NASDAQ OMX internal system tracking number

4.5 Modify Order Messages

Modify Order messages always include the Order Reference Number of the Add Order to which the update applies. To determine the current display shares for an order, BX TotalView-ITCH 5.0 subscribers must deduct the number of shares stated in the Modify message from the original number of shares stated in the Add Order message with the same reference number. NASDAQ OMX BX may send multiple Modify Order messages for the same order reference number and the effects are cumulative. When the number of display shares for an order reaches zero, the order is dead and should be removed from the book.

4.5.1 Order Executed Message

This message is sent whenever an order on the book is executed in whole or in part. It is possible to receive several Order Executed Messages for the same order reference number if that order is executed in several parts. The multiple Order Executed Messages on the same order are cumulative.

By combining the executions from both types of Order Executed Messages and the Trade Message, it is possible to build a complete view of all non-cross executions that happen on NASDAQ OMX BX. Cross execution information is available in one bulk print per symbol via the Cross Trade Message.

ORDER EXECUTED MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"E"	Order Executed Message.
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Order Reference Number	5	8	Integer	The order reference number associated with the executed order.
Executed Shares	13	4	Integer	The number of shares executed.
Match Number	17	8	Integer	The BX generated day-unique Match Number of this execution. The match number is also referenced in the Trade Break Message.
Stock Locate	25	2	Integer	Locate code identifying the security symbol for which the order is being added
Validation ID	27	8	Long	NASDAQ OMX internal system tracking number

4.5.2 Order Executed With Price Message

This message is sent whenever an order on the book is executed in whole or in part at a price different from the initial display price. Since the execution price is different than the display price of the original Add Order, NASDAQ OMX BX includes a price field within this execution message.

It is possible to receive multiple Order Executed and Order Executed With Price messages for the same order if that order is executed in several parts. The multiple Order Executed messages on the same order are cumulative.

These executions may be marked as non-printable. If the execution is marked as non-printed, it means that the shares will be included into a later bulk print (e.g., in the case of cross executions). If a firm is looking to use the data in time-and-sales displays or volume calculations, NASDAQ OMX BX recommends that firms ignore messages marked as non-printable to prevent double counting.

ORDER EXECUTED WITH PRICE MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"C"	Order Executed Message.
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Order Reference Number	5	8	Integer	The reference number of the order that was executed.
Executed Shares	13	4	Integer	The number of shares executed.

NASDAQ OMX BX TOTALVIEW-ITCH 5.0
INTERFACE SPECIFICATION

Match Number	17	8	Integer	The NASDAQ OMX BX generated day-unique Match Number of this execution. The match number is also referenced in the Trade Break Message.
Printable	25	1	Alpha	Indicates if the execution should be reflected on time and sale displays and volume calculations. "N" = non-printable "Y" = printable
Execution Price	26	4	Integer	The price at which the order execution occurred. Refer to Data Types for field processing notes.
Stock Locate	30	2	Integer	Locate code identifying the security symbol for which the order is being added
Validation ID	32	8	Long	NASDAQ OMX internal system tracking number

4.5.3 Order Cancel Message

This message is sent whenever an order on the book is modified as a result of a partial cancellation.

ORDER CANCEL MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"X"	Order Cancel Message.
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Order Reference Number	5	8	Integer	The reference number of the order being reduced.
Canceled Shares	13	4	Integer	The number of shares being removed from the display size of the order as the result of a cancellation.
Stock Locate	17	2	Integer	Locate code identifying the security symbol for which the order is being added
Validation ID	19	8	Long	NASDAQ OMX internal system tracking number

4.5.4 Order Delete Message

This message is sent whenever an order on the book is being cancelled. All remaining shares are no longer accessible so the order must be removed from the book.

ORDER DELETE MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"D"	Order Delete Message.
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Order Reference Number	5	8	Integer	The reference number of the order being canceled.
Stock Locate	13	2	Integer	Locate code identifying the security symbol for which the order is being added
Validation ID	15	8	Long	NASDAQ OMX internal system tracking number

NASDAQ OMX BX TotalView-ITCH 5.0
INTERFACE SPECIFICATION

4.5.5 Order Replace Message

This message is sent whenever an order on the book has been cancel-replaced. All remaining shares from the original order are no longer accessible, and must be removed. The new order details are provided for the replacement, along with a new order reference number which will be used henceforth. The side, stock, and attribution (if any) remain the same as the original order, so they are not given in this message.

ORDER REPLACE MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"U"	Order Replace Message
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Original Order Reference Number	5	8	Integer	The original reference number of the order being replaced.
New Order Reference Number	13	8	Integer	The new reference number for this order. Note that new reference numbers mean new time priority, so this order belongs below other orders at the same price in priority.
Shares	21	4	Integer	The new total displayed quantity.
Price	25	4	Integer	The new display price for the order. Refer to Data Types for field processing notes.
Stock Locate	29	2	Integer	Locate code identifying the security symbol for which the order is being added
Validation ID	31	8	Long	NASDAQ OMX internal system tracking number

4.6 Trade Messages

4.6.1 Trade Message (Non-Cross)

The Trade Message is designed to provide execution details for normal match events involving non-displayable order types. (Note: There is a separate message for cross events.)

Since no Add Order Message is generated when a non-displayed order is initially received, the system cannot use the Order Executed messages for all matches. Therefore this message indicates when a match occurs between non-displayable order types. A Trade Message is transmitted each time a non-displayable order is executed in whole or in part. It is possible to receive multiple Trade Messages for the same order if that order is executed in several parts. Trade Messages for the same order are cumulative.

Trade Messages should be included in NASDAQ OMX BX time-and-sales displays as well as volume and other market statistics. Since Trade Messages do not affect the book, however, they may be ignored by firms just looking to build and track the NASDAQ OMX BX display.

TRADE MESSAGE (NON-CROSS)				
Name	Offset	Length	Value	Notes
Message Type	0	1	"P"	Trade Message
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.

NASDAQ OMX BX TOTALVIEW-ITCH 5.0
INTERFACE SPECIFICATION

Order Reference Number	5	8	Integer	The unique reference number assigned to the order on the book being executed. Effective December 6, 2010, NASDAQ OMX will populate the Order Reference Number field within the Trade (Non-Cross) message as zero. For the binary versions of the TotalView-ITCH data feeds, the field will be null-filled bytes (which encodes sequence of zero).
Buy/Sell Indicator	13	1	Alpha	The type of non-display order on the book being matched. "B" =buy order "S" =sell order Effective 07/14/2014, this field will always be "B" regardless of the resting side
Shares	14	4	Integer	The number of shares being matched in this execution.
Stock Locate	18	2	Integer	Locate code identifying the security symbol for which the order is being added
Price	20	4	Integer	The match price of the order. Refer to Data Types for field processing notes.
Match Number	24	8	Integer	The NASDAQ OMX BX generated session-unique Match Number for this trade. The Match Number is referenced in the Trade Break Message.
Validation ID	32	8	Long	NASDAQ OMX internal system tracking number

4.6.2 Cross Trade Message

The Cross Trade message is only applicable for eligible BX-listed securities and indicates that BX has completed its cross process for a specific BX-listed security. BX sends out a Cross Trade message for all active BX-listed issues in the system following the Opening and Closing cross events. Firms may use the Cross Trade message to determine when the cross for each BX-listed security has been completed. (Note: For the halted securities, firms should use the Trading Action message to determine when an issue has been released for trading.)

For most BX-listed securities, the Cross Trade message will indicate the bulk volume associated with the cross event. If the order interest is insufficient to conduct a cross in a particular issue, however, the Cross Trade message may show the shares as zero.

To avoid double counting of cross volume, firms should not include transactions marked as non-printable in time-and-sales displays or market statistic calculations.

CROSS TRADE MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"Q"	Cross Trade Message
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Shares	5	8	Integer	The number of shares matched in the BX Cross.
Stock Locate	13	2	Integer	Locate code identifying the security

NASDAQ OMX BX TotalView-ITCH 5.0
INTERFACE SPECIFICATION

				symbol for which the order is being added
Cross Price	15	4	Integer	The price at which the cross occurred. Refer to Data Types for field processing notes.
Match Number	19	8	Integer	The BX generated day-unique Match Number of this execution.
Cross Type	27	1	Alpha	The BX cross session for which the message is being generated. "O" = BX Opening Cross. "C" = BX Closing Cross. "H" = Cross for IPO and halted securities. "I" = BX Cross Network: Intraday Cross and Post-Close Cross
Validation ID	28	8	Long	NASDAQ OMX internal system tracking number

4.6.3 Broken Trade / Order Execution Message

The Broken Trade Message is sent whenever an execution on NASDAQ OMX BX is broken. An execution may be broken if it is found to be "clearly erroneous" pursuant to Clearly Erroneous Policy. A trade break is final; once a trade is broken, it cannot be reinstated.

Firms that use the BX TotalView-ITCH 5.0 feed to create time-and-sales displays or calculate market statistics should be prepared to process the broken trade message. If a firm is only using the BX TotalView-ITCH feed to build a book, however, it may ignore these messages as they have no impact on the current book.

BROKEN TRADE MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"B"	Broken Trade Message.
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Match Number	5	8	Integer	The NASDAQ OMX BX Match Number of the execution that was broken. This refers to a Match Number from a previously transmitted Order Executed Message, Order Executed With Price Message, or Trade Message.
Validation ID	13	8	Long	NASDAQ OMX internal system tracking number

4.7 Net Order Imbalance Indicator (NOII) Message

NASDAQ OMX BX disseminates NOII data at 5-second intervals in the minutes leading up to the BX Opening Cross and BX Closing Cross.

- For the BX Opening Cross, NOII messages will be disseminated during the two minutes leading up to the start of market hours.
- For the BX IPO and Halt Crosses, NOII messages will be disseminated during the quote only period. The first NOII message will be disseminated approximately five seconds after the Stock Trading Action message with the "B" action value is disseminated.

NASDAQ OMX BX TOTALVIEW-ITCH 5.0
INTERFACE SPECIFICATION

- For the BX Closing Cross, NOII messages will be disseminated during the ten minutes leading up to the end of market hours.

Please note that BX generates this message only for those BX-listed securities that are eligible for the BX Opening and Closing Crosses.

NOII MESSAGE				
Name	Offset	Length	Value	Notes
Message Type	0	1	"I"	NOII Message
Timestamp - Nanoseconds	1	4	Integer	Nanoseconds portion of the timestamp.
Paired Shares	5	8	Integer	The total number of shares that are eligible to be matched at the Current Reference Price.
Imbalance Shares	13	8	Integer	The number of shares not paired at the Current Reference Price.
Imbalance Direction	21	1	Alpha	The market side of the order imbalance. "B" = buy imbalance "S" = sell imbalance "N" = no imbalance "O" = Insufficient orders to calculate
Stock	22	8	Alpha	The BX-listed security symbol for which the NOII message is being generated
Far Price	30	4	Integer	A hypothetical auction-clearing price for cross orders only. Refer to Data Types for field processing notes.
Near Price	34	4	Integer	A hypothetical auction-clearing price for cross orders as well as continuous orders. Refer to Data Types for field processing notes.
Current Reference Price	38	4	Integer	The price at which the NOII shares are being calculated. Refer to Data Types for field processing notes.
Cross Type	42	1	Alpha	The type of BX cross for which the NOII message is being generated. These messages are only applicable for BX-listed securities. "O" = BX Opening Cross "C" = BX Closing Cross "H" = Cross for IPO and halted BX-listed securities
Price Variation Indicator	43	1	Alpha	This field indicates the absolute value of the percentage of deviation of the Near Indicative Clearing Price to the nearest Current Reference Price. "L" = Less than 1% "1" = 1 to 1.99% "2" = 2 to 2.99% "3" = 3 to 3.99% "4" = 4 to 4.99% "5" = 5 to 5.99% "6" = 6 to 6.99% "7" = 7 to 7.99% "8" = 8 to 8.99% "9" = 9 to 9.99%

NASDAQ OMX BX TOTALVIEW-ITCH 5.0
INTERFACE SPECIFICATION

				"A" = 10 to 19.99% "B" = 20 to 29.99% "C" = 30% or greater Space = Cannot be calculated

Appendix A

Documentation Revision Control Log

June 12, 2014: NASDAQ TotalView-ITCH Version 5.0

Released a new version of TotalView-ITCH documentation to support the following change:

- Per [Data Technical News #2014-17](#), Revised the Buy/Sell Indicator value in the Trade Message (Non-Cross) to "Always 'B' regardless of resting side"

July 10, 2013: NASDAQ TotalView-ITCH Version 5.0

Released a new version of the TotalView-ITCH documentation to support the following change:

- Incorporation of Symbol Locator Codes
- Added Enhanced Symbol Directory
- Added Market-Wide Circuit Breaker (MWCB) Messaging
 - MWCB Decline Level Message
 - MWCB Status Message
- Addition of an internal tracking number to multiple messages
- Addition of 'C' to the Financial Status Indicator field in the Symbol Directory Message

March 11, 2013: BX TotalView-ITCH Version 4.1

NASDAQ OMX added the following Trading Action Reason Code for LULD to reflect when the National Best Bid is below the lower price band and/or the National Best Offer is above than the upper price band and the NMS Stock is not in a Limit State.

- LUDS - Volatility Trading Pause – Straddle Condition

January 9, 2013: BX TotalView-ITCH Version 4.1

NASDAQ OMX added the following Trading Action Reason Code:

- MWC0 - Market Wide Circuit Breaker Halt – Carry over from previous day

January 8, 2013: BX TotalView-ITCH Version 4.1

NASDAQ OMX removed the Trading Action State, "P", from the Stock Trading Message.

November 6, 2012: BX TotalView-ITCH Version 4.1

Released a new version of the TotalView-ITCH documentation to support the following changes:

- Added the "P" value to the Trading State in the Stock Trading Message.
- Modified the values for the Trading Action Reason Codes. Added the following codes:
 - LUDP - Volatility Trading Pause
 - MWC1 - Market Wide Circuit Breaker Halt – Level 1
 - MWC2 - Market Wide Circuit Breaker Halt – Level 2
 - MWC3 - Market Wide Circuit Breaker Halt – Level 3
 - MWCQ - Market Wide Circuit Breaker Resumption
- Removed the Trading Action State, "V", related to the Volatility Guard Program.

November 1, 2011: BX TotalView-ITCH Version 4.1

NASDAQ OMX updated the Market Category message to include the code "Z" for BATS-listed securities.

December 3, 2010: BX TotalView-ITCH Version 4.1

NASDAQ OMX clarifies that the Trade (Non-Cross) message format is accurate and the Timestamp field is applicable to this message. In addition, NASDAQ OMX updated the Regulation SHO Restriction message to include a Timestamp field and adjusted all offsets appropriately.

October 27, 2010: BX TotalView-ITCH Version 4.1

NASDAQ OMX updated the Trade (Non-Cross) message format to remove the Timestamp field as this not applicable to this message. In addition, all offsets were updated appropriately.

NASDAQ OMX BX TotalView-ITCH 5.0
INTERFACE SPECIFICATION

October 6, 2010: BX TotalView-ITCH Version 4.1

NASDAQ OMX added a note to Trade (Non-Cross) message format stating that the Order Reference Number would be zero for all transactions as of December 6, 2010.

July 14, 2010: BX TotalView-ITCH Version 4.1

NASDAQ OMX added a new Regulation SHO Short Sale Price Test Restricted Indicator message format to be introduced in the fourth quarter of 2010.

July 2, 2010: BX TotalView-ITCH Version 4.1

NASDAQ OMX added a new Trading State code value of "V" to the Stock Trading Action message to denote a NASDAQ Volatility Guard trading pause.

May 25, 2010: BX TotalView-ITCH Version 4.1

NASDAQ OMX added two new Trading Action Reason code values (T5 and T7) for single security trading pause situations.

January 26, 2010 – BX TotalView-ITCH Version 4.1 (New Symbology)

Released a new version of the BX TotalView-ITCH documentation to support the following changes:

- Increased length of the symbol field from 6 characters to 8 characters in multiple message formats in support of the equity symbology initiative.
- Modified the values for the Market Category field in Symbol Directory messages to delineate among NYSE-, NYSE Amex- and NYSE Arca-listed issues.
- Added note to Appendix B to reflect that NASDAQ OMX is reviewing its stock symbol conventions to determine if changes are needed.

Appendix B

Stock Symbol Convention

NASDAQ OMX is in the process of revising its stock symbol suffix plan to accommodate root symbols of up to 5 characters across U.S. equity exchanges. Once the new plan is confirmed, NASDAQ OMX will post a Data Technical News item on the NASDAQ OMX Trader website with details.

Until further notice, NASDAQ OMX will follow its current practice.

For NYSE-, NYSE Amex- and NYSE Arca-listed securities with subordinate issue types, please refer to the [Ticker Symbol Conversion for CQS Securities page](#) on the NASDAQ OMX Trader website.

For NASDAQ-listed issues, NASDAQ OMX currently restricts its symbol length to a maximum of 5 characters. For common stock issuances, NASDAQ and BX will assigns a symbol of 1 to 4 characters in length. For subordinate securities, NASDAQ and BX will assigns a 5 character symbol for which the last character relays information about the issue class or issue type. For the current list of fifth character symbol suffixes, please refer to [Current List of Fifth Character Symbol Suffixes for NASDAQ-listed Issues](#) on the NASDAQ OMX Trader website.

Appendix C

Trading Action – Reason Codes

For NASDAQ-listed issues, NASDAQ acts as the primary market and has the authority to institute a trading halt in an issue due to news dissemination or regulatory reasons.

For BX-listed issues, NASDAQ OMX BX acts as the primary market and has the authority to institute a trading halt in an issue due to news dissemination or regulatory reasons.

For CQS issues, NASDAQ and BX abide by any regulatory trading halts instituted by the primary or listing market as appropriate.

For all issue types, NASDAQ and/or BX may also halt trading for operational reasons.

NASDAQ and/or BX will send out a trading action message to inform its market participants when the trading status of an issue changes. For informational purposes, NASDAQ and BX also attempt to provide the reason for each trading action update. For bandwidth efficiency reasons, NASDAQ and BX use a 4-byte code for the reason on its outbound data feeds.

REASON CODES FOR TRADING HALT ACTIONS	
Code	Value
